Token

economy

PET is a deflationary token, based on a Permanent Repurchasing Plan (PRP) of sell orders on the IBEx SPOT market. **15% of our revenues will be allocate to the PRP.**

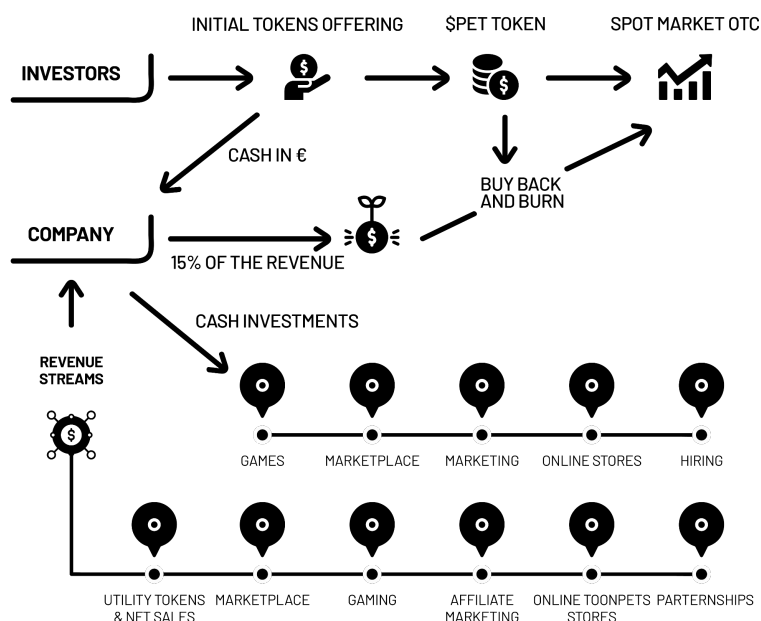

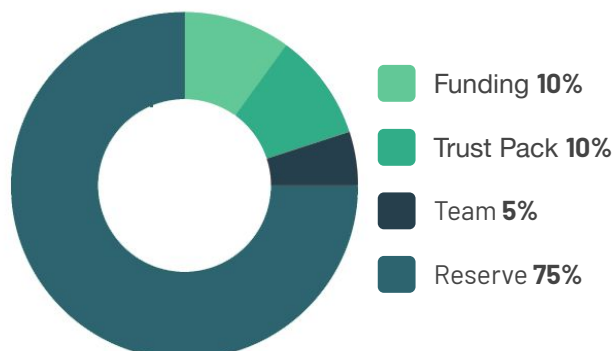

By destroying half of the redeemed tokens, we will reduce the tokens supply and mechanically increasing the unit value of the remaining tokens. The other half not destroyed will be added back to the RESERVE.

TEAM tokens allocation is locked for 36 months with a vesting period of another 36 months by 1/36th monthly.
